Medfin is a healthcare services platform focused on day-care surgeries. The health-tech firm helps patients navigate the entire surgical and related diagnostics processes, including connecting them with surgeons, finding the right course of treatment, performing cost estimates, and insurance coverage checks.

In a statement, founder Arjun Kumar said nearly 60% of all surgeries can be performed at day-care centres and ASCs owing to technological advances. This will help in reducing costs for procedures including varicose veins, fibroids, kidney stones, and hernia.
